***Specification***

The examiner has not checked the specification to the extent necessary to determine the presence of all possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, if any.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, if any, should be updated in a timely manner.

***Election/Restriction***

The examiner again requests clarification of the elected species for examination in this application. Applicant specified Cl-Si-MCM41. However, applicant designated the species as “metal oxide” (which MCM is NOT). Now the claims have been amended to recite a zeolite-like catalyst, and MCM is a mesoporous, frequently amorphous material, not a crystalline, microporous zeolite-type catalyst. Applicant needs to conform the selected claim terminology to be consistent with the composition being examined.

Art Unit: 1793

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 remain rejected under 35 U.S.C. 102(b) as being anticipated by US 6,437,191 to Choudhary et al., for the reasons set forth in the previous office action.

With respect to this rejection, applicant argues that the claimed catalyst is a partially halogenated metal oxide which is not disclosed in the cited patent.

This position is not convincing. The patent discloses Si-MCM41 that is treated with halogen containing compounds. Accordingly, it reads on the “metal oxide” claimed in this application.

Claims 1-4 remain rejected under 35 U.S.C. 102(b) as being anticipated by US 6,383,966 to Choudhary et al., for the reasons set forth in the previous office action.

With respect to this rejection, applicant argues that the residual halogen of Han is much smaller than that present in the instant composition.

This line of reasoning is not convincing because 5000 ppm halide is considered to overlap in scope the range of 0.01-0.5 weight percent. The reference is anticipatory at the point of overlap.

Claims 1-11 remain rejected under 35 U.S.C. 102(b) as being anticipated by US 6,459,000 to Choudhary et al., for the reasons set forth in the previous office action.

With respect to this rejection, Applicant argues that the patent doesn't provide any guidance that halogen is present in amounts as claimed as an active constituent in the acid catalyst.

This line of reasoning is not convincing. As the reference makes the catalyst in a manner virtually identical to that employed by applicant, it would naturally flow that the halogen remains in appropriate amount as an active component of the reference catalyst.

***Conclusion***

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
